Self-Control
Honesty
Inspire
Never Quit
Exemplify Christ

Our mission is to enhance the total educational development of each student and to foster in them a sense of responsibility and awareness based upon the teachings of the Catholic Church.

Announcement

As more information becomes available regarding procedures for COVID-19, we will send that out to families. Please look for an email this evening from Mrs. Olejnik with additional information.

Read-A-Thon

The H & S Association's MAJOR fund-raiser is going on now! This year instead of the traditional walk-a-thon, we will be hosting a Read-a-thon fundraiser that will last the entire month of March. We have many fun activities planned throughout the month to promote reading; The Battle of the Books winner will be announced next week! We are asking each family to raise \$50 and have an easy online registration so kids will not have to go door to door. Please contact the office if you need help setting up your online account. Thank you for your support!

Vaccine Information

Every year we are required send out information from the Health Department regarding vaccinations. Please see the attached sheets for more information.

Support our School!

Scrip Schedule

Spring Break & Easter
We will be closed April 6-12.
Orders in by 8:30 AM on Monday, April 13 will be ready on Thursday, April 16 or Sunday, April 19.

MOMENTS BECOME MEMORIES

Even amazing moments can fade with time. Capture the year in all its glory, and keep it fresh with a St. John Vianney School yearbook. This is your last chance to grab your copy now!

[ORDER YEARBOOK](#)

PARENTS VACCINES REQUIRED FOR SCHOOL ENTRY IN MICHIGAN

Whenever children are brought into group settings, there is a chance for diseases to spread. Children must follow state vaccine laws in order to attend school. These laws are the minimum standard to help prevent disease outbreaks in school settings. The best way to protect your child from other serious diseases is to follow the recommended vaccination schedule at www.cdc.gov/vaccines. Talk to your health care provider to make sure your child is fully protected.

	All Kindergarteners and 4-6 year old transfer students	All 7th Graders and 7-18 year old transfer students
Diphtheria, Tetanus, Pertussis (DTP, DTaP, Tdap)	4 doses DTP or DTaP 1 dose must be at or after 4 years of age	4 doses D and T or 3 doses Td if 1st dose given at or after 1 year of age 1 dose Tdap at 11 years of age or older upon entry into 7th grade or higher
Polio	4 doses 3 doses if dose 3 was given at or after 4 years of age	
Measles, Mumps, Rubella (MMR)*	2 doses at or after 12 months of age	
Hepatitis B*	3 doses	
Meningococcal Conjugate (MenACWY)	None	1 dose at 11 years of age or older upon entry into 7th grade or higher
Varicella (Chickenpox)*	2 doses at or after 12 months of age or Current lab immunity or History of varicella disease	

During disease outbreaks, incompletely vaccinated students may be excluded from school. Parents and guardians choosing to decline vaccines must obtain a certified non-medical waiver from a local health department. Read more about waivers at www.michigan.gov/immunize.

* the child has not received these vaccines, documented immunity is required.

doses of vaccines must be valid (correct spacing and ages) for school entry purposes.

TEEN VACCINES INFORMATION FOR PARENTS

M eningococcal Vaccines (MenACWY, MenB)	A dolescent Catch-Up	T etanus, Diphtheria, Pertussis (Tdap)	H uman Papillomavirus (HPV)
<p>Meningococcal vaccines protect against meningitis, which affects the brain and spinal cord.</p> <p>Meningitis is easily spread through close contact with an infected person, such as coughing, kissing, and sharing food or drinks. Initial symptoms include a fever, rash, headache, or stiff neck.</p> <p>Meningitis can cause brain damage, severe disabilities, or death.</p> <p>MenACWY vaccine is given at 11-12 years with a second dose at 16. MenB vaccine is given at 16-18 years in a series of doses.</p> <p>If your child has not received these vaccines, talk to their health care provider today.</p>	<p>If your child has not already received the vaccines below, it's not too late to get them protected against these diseases!</p> <p>3 doses of hepatitis B vaccine (HepB)</p> <p>2 doses of hepatitis A vaccine (HepA)</p> <p>2 doses of measles, mumps, rubella vaccine (MMR)</p> <p>2 doses of varicella (chickenpox) vaccine</p> <p>At least 3 doses of polio vaccine (IPV/OPV)</p> <p>Flu vaccine every year</p> <p>These vaccines are important, especially if your child plans to travel. All doses are needed for full protection.</p>	<p>Tdap vaccine protects your child against tetanus, diphtheria, and pertussis (whooping cough).</p> <p>Tetanus is serious and causes painful tightening of the muscles. It is found in soil and enters the body through a cut or wound.</p> <p>Diphtheria can make it hard to breathe or move body parts. It is spread by coughing or sneezing.</p> <p>Pertussis is spread by coughing, sneezing, or close contact with an infected person. It can cause severe coughing and choking, making it hard to breathe or eat.</p> <p>Tdap vaccine is usually given at 11-12 years. However, anyone who has not had Tdap vaccine needs a dose.</p>	<p>HPV vaccine protects against genital warts, cervical, oropharyngeal, vaginal, vulvar, penile, and anal cancers.</p> <p>HPV is a virus transmitted by skin-to-skin contact. Almost everyone will get an HPV infection in their lifetime. Many HPV infections have no symptoms, so a person may transmit the virus to others without knowing.</p> <p>The best time to get HPV vaccine is at 11-12 years. When started before the 15th birthday, most adolescents will only need 2 doses. People can get HPV vaccine through 26 years.</p> <p>HPV vaccine is safe, effective, and is cancer prevention.</p>

The Michigan Department of Health and Human Services (MDHHS) does not discriminate against any individual or group because of race, religion, age, national origin, color, height, weight, marital status, genetic information, sex, sexual orientation, gender identity or expression, political beliefs or disability. MDE and MDHHS are required by law (MCL 380.1177a) to develop and make available to schools information on meningococcal and HPV vaccines. MDHHS is also required (MCL 333.9205b) to notify schools of the availability of HPV educational materials, and encourage schools to make them available to parents.
